PROFESSIONAL SUMMARY

Java Full Stack Developer with hands-on experience building secure REST APIs using Spring Boot, Spring Security (JWT), MySQL, and developing responsive frontend applications using React.js. Skilled in building full-stack web applications with clean architecture, role-based authentication, REST API integration, and scalable backend systems. Eager to contribute to real-world software projects and grow through practical industry experience.

EDUCATION

NRI Institute of Technology

B.Tech in Computer Science & Engineering (AI & ML) — CGPA: 8.86

Vijayawada, Andhra Pradesh

Sep 2022 – Apr 2026

Sri Vagdevi Junior College

Board of Intermediate Education (MPC) — Percentage: 90%

Nuzvid, Andhra Pradesh

June 2020 - May 2022

Thrividha E.M. High School

Board of Secondary Education (SSC) — Percentage: 97.4%

Nuzvid, Andhra Pradesh

June 2019 – Apr 2020

TECHNICAL SKILLS

Languages: Java, SQL, JavaScript

Backend: Spring Boot, Spring Security, Spring MVC, REST APIs, Hibernate/JPA

Frontend: Html, CSS, React.js, Axios

Databases: MySQL, MongoDB

Tools & Platforms: Git, GitHub, Maven, Postman, Linux, JUnit

Core CS: OOP, DBMS, Data Structures, MVC Architecture

PROJECTS

VaultEdge-Enterprise-Banking-System

Nov 2025 – Dec 2025

Tech Stack: Java, Spring Boot, Spring Security, JWT, REST APIs, MySQL, React.js, Axios

🔗 GitHub

- Developed a full-stack banking application using Spring Boot and React.js with JWT-based authentication, role-based access control, OTP verification, and REST APIs for accounts, transfers, transactions, and loans.
- Built secure fund transfer and loan workflows using Spring Boot, @Transactional, JPA/Hibernate, and MySQL; integrated 15+ secured APIs in React using Axios interceptors, protected routing, and centralized error handling.
- Designed responsive Customer and Admin dashboards with React.js and Context API for account management, transaction history, EMI calculation, loan tracking, and approval/rejection workflows; tested APIs using Postman and managed code with Git/GitHub.

ExpenseIQ

Aug 2025 – Sep 2025

Tech Stack: Java, Spring Boot, JPA, MySQL

🔗 GitHub

- Built a Spring Boot-based backend expense management system with clean layered architecture, implementing REST APIs for user management, category creation, and daily expense tracking using real-life scenarios (food, travel, subscriptions, bills).
- Designed a modular monolithic structure with clear separation of concerns using Controllers, Services, DTOs, Repositories, and centralized exception handling; implemented Spring Data JPA with Hibernate for efficient CRUD operations.
- Integrated schema.sql and data.sql for automatic database setup and sample data seeding; tested APIs using Postman; added global exception handling with custom exceptions; documented the project and maintained version control using Git and GitHub

WORK EXPERIENCE

Generative AI Intern – Codegnan (APSCHE)

May 2024 – July 2024

- Developed a web application using generative AI tools and prompt engineering.
- Documented real-world use cases and applications of generative AI systems.
- Integrated AI components with backend services through API-based interactions.

Machine Learning Intern – SkillDzire

May 2025 – June 2025

- Worked on machine learning models including Linear Regression and CNN-based image classification.
- Implemented NLP-based recommender systems using Python and TensorFlow.
- Worked on data processing pipelines and interaction between ML models and backend services.

ACHIEVEMENTS & CERTIFICATIONS

Top 10 Finalist among 363+ teams at the **2025 CodeSpark India Hackathon** for building **FreeBird**, an offline emergency safety application designed for use in no-internet disaster scenarios.

Certifications: Linux, Core Java, Advanced Java with Spring Boot & Microservices — **Frontlines EduTech**.
